

Parks and Recreation Board

Meeting Minutes

Monday, September 12, 2016 – 6:30 p.m.
Wylie Municipal Complex
300 Country Club Road #100
Wylie, Texas 75098

CALL TO ORDER

Board Chairman Rose called the meeting to order at 6:30 p.m. with Board Member Board Member Harris, Board Member Jones, Board Member Kinser, Board Member White, and Board Member Robinson present. Board Member Chesnut was absent from the meeting.

Staff members present were Parks and Recreation Superintendent, Robert Diaz, and Parks Board Secretary, Janet Hawkes.

CITIZENS PARTICIPATION

No Citizens came forward.

BUSINESS ITEMS

1. **Consider and act upon approval of the Minutes from the August 8, 2016 meeting.**

Board Action:

Board Member Jones made a motion to approve the minutes from the August 8, 2016 meeting. Board Member Harris seconded the motion, and a vote was taken and passed 6-0.

DISCUSSION ITEMS

- **Hail storm damage facility update – Bart Peddicord Community Center (BPCC,) Brown House, and Wylie Senior Recreation Center.**

Superintendent Diaz updated the board on the status of hailstorm repairs. The Wylie Senior Recreation Center roof remains the number one repair priority due to its excessive damage. The Center needs HVAC repair, drywall replacement, and extensive interior clean up. The seniors continue to meet temporarily nearby at the Waterbrook Bible Fellowship church on Thomas Street.

Due to its specialization, the City is working through an architect to obtain quotes on the Brown House roof, which makes the process more complex and time consuming. Decking will likely need to be added to the cost since there currently is no decking on the roof. The Wylie Fire Department does not recommend replacing the roof with the wood shake style as to the heavy fire hazard which that type poses; if we do opt for the wood shake roof, City Building Code will require installation of an interior sprinkler system throughout. Over all, the roof will be chosen with cost effectiveness in mind. All of the Brown House windows on the west side are broken and need replaced. No solid date has been set to reopen due to the lengthy process, but it will not likely be before spring 2017 due to the repair process. Full time employees of the Brown House

and Senior Center continue to office out of the Parks Building on Hensley Rd., and staff of both will be participating in the Boo on Ballard event and Wylie Arts Festival as in years past. There will continue to be no public admittance inside the Brown House, and the property gates will remain locked due to safety and liability issues. Grounds will be receiving heavy yard cleanup and maintenance this fall.

The repair and reopening of the Bart Peddicord Community Center has still not been determined, but staff feel that the Wylie Economic Development Corporation will likely recommend its closing.

The roofs at Community Park took the hardest hit, and although it and other area park pavilions have damage, they continue to function as usual. Damaged playground shade covers have all been replaced. The playground "tree tops" at Community Park were causing the structure to shift so staff completely removed the tops for safety reasons. Staff will look at requesting funding from the Acquisition and Improvement Fund the next fiscal year to replace the playground equipment at Community Park and Friendship Park's playgrounds.

- **Municipal Complex Trail-East Meadow update.**

Superintendent Diaz advised the Board that the trail site plan, included in the packet, had been updated according to their requests during the August meeting. The preliminary East Meadow Trail design now includes the following: 1) an alternate location for the planned art piece situated between the existing trail and the parking lot (the lot was shifted slightly east to better accommodate), 2) added dog stations along the trail, 3) locations for all of the solar lights, and 4) inclusion of trail stub outs as add alternate locations to connect future trails.

Staff discussed with the consultants the area near the connector to the Creek Hollow neighborhood. Extensive fill and grade work will be necessary for bridge construction and a low-water crossing. Remedial options suggested by the architect include a 200 foot boardwalk in lieu of the prefabricated bridge and low-water crossing. Another suggestion was that we reduce the trail width to eight feet wide instead of twelve feet wide. This will be more cost effective due to the use of less material and reduced need for tree removal and clearing.

Board Member White expressed his concern over the boardwalk being a liability due to the surface being slick. Superintendent Diaz advised that staff would opt for a slip resistant material such as a precast concrete. Board Member Kinser stated that the City of Richardson, where he is employed, have installed a type of boardwalk material made of textured Trex composite decking, which he advised is more expensive than treated wood, but less slippery, easier to install, and lower maintenance with fewer issues. Board Member Kinser agreed to tour staff at the Richardson parks where this type of textured Trex boardwalk had previously been installed; these parks include Citywide West, Spring Creek Nature Preserve and the Prairie Creek Park.

ADJOURNMENT

There being no further business, a motion to adjourn was made by Board Member Kinser. Board Member Jones seconded the motion, and a vote was taken and passed 6-0. The meeting was adjourned at 7:17 p.m.

ATTEST

Janet Hawkes Parks Board Secretary

Matt Rose, Parks Board Chairman
