Ammonia Leak at Wylie Water Treatment Plant *No injuries, no evacuations, no impacts to water quality*

WYLIE, TX – July 20, 2017 -- The Wylie Fire Department and crews from the North Texas Municipal Water District have responded to a leaking ammonia storage tank at the NTMWD Wylie water treatment plant. NTMWD crews noticed the leak at approximately 4:00 Thursday afternoon and notified the Wylie Fire Department.

Water treatment operations are continuing with no impacts to water quality or delivery. No injuries have been reported, and no evacuations have been ordered at this time.

Ongoing air monitoring will occur as long as needed. Plano and Richardson Hazmat teams are on site to assist.

Wylie residents can receive update notifications by texting your zip code to 888777.

About NTMWD

The North Texas Municipal Water District is a regional wholesale provider of water, wastewater and solid waste disposal services for approximately 1.6 million residents across 10 counties – a service territory covering 2,200 square miles. For more information, visit NTMWD.com.
