

Our Mission...

*...to ensure the safety and welfare of the general public
by enforcing building, electrical, plumbing and mechanical
code regulations within the city.*

ASBESTOS SURVEY CERTIFICATION

On September 1, 2001, Senate Bill 509 was passed into law, affecting permits issued on or after January 1, 2002. This Bill requires municipalities to verify that an asbestos survey has been conducted prior to issuing renovation or demolition permits for public or commercial buildings. This survey shall be in accordance with the Texas Asbestos Health Protection Rules (hereafter referred to as TAHPR) and the National Emission Standards for Hazardous Air Pollutants (hereafter referred to as NESHAP). For this purpose, a commercial building is defined as a non-residential structure or apartment building (greater than two dwelling units). A public building would include schools, churches, and government buildings (federal, state, county, and local).

Therefore, beginning January 1, 2002 any permit issued for demolition or renovation of a public or commercial building, as defined herein, shall not be issued until verification that an asbestos survey has been conducted in accordance with the TAHPR and NESHAP.

Verification shall be by means of the attached City of Wylie Asbestos Survey Certification form. This form shall be completed and signed by the building owner or his agent (applicant) prior to the issuance of any permit for any demolition work or any renovation work performed on an existing structure meeting the definition of a commercial or public building. The signed form shall become a part of the permit, and shall be kept on file with the permit and all associated documents.

Information regarding asbestos survey providers, as well as other information regarding compliance with Senate Bill 509 – Implementing Requirements to Verify Asbestos Surveys - may be obtained through the Texas Department of Health’s Asbestos Program website at: www.dshs.state.tx.us/asbestos.

ASBESTOS CERTIFICATION

I hereby certify that an asbestos survey has been done in accordance with the Texas Asbestos Health Protection Rules (TAHPR) and the National Emission Standards for Hazardous Air Pollutants (NESHAP) for the area(s) being renovated and/or demolished.
